**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 December 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

### **Response to Amendment**

1. This Office Action is in response to the amendment filed 12/20/2006. Claims 1-4 were amended. Claims 5 and 7 were withdrawn from consideration. Claim 6 was cancelled. Accordingly, claims 1-4 are currently pending and have been examined in this Office Action.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by the U. S. Patent Application Publication No. 2003/0177391 A1 by Ofek et al., hereinafter Ofek.

Regarding claim 1, Ofek teaches a sending apparatus comprising: means for sequentially sending packet data generated based on a predetermined communication protocol via a network ([0024] - sending data packets over the network; [0073] and Fig. 1 - item 110TFG - sending packets; [0028] - implementation of specific protocol); means for receiving a request from a receiver device to add identification information to said sent packet data only during a predetermined period ([0073] and Fig. 1 - item 120TTC -

receiving data packets and checking Security Tags 111 (identification information added to sent packets); [0087], [0103] and Fig. 6 - packets with security tags are sent sending in response to time stamps during predetermined time intervals); and means for adding said requested identification information to said sent packet data, said identification information uniquely identifying each packet of data sent from said sending apparatus (Fig. 1 and [0073] - Security Tags 111).

Regarding claim 2, Ofek teaches the sending apparatus according to claim 1, wherein said means for adding said requested identification information adds said identification information to each of said packet of data in a unencoded state in its forward direction ([0073] Security tags 111 are simply a part of the data packet header).

Regarding claim 3, Ofek teaches the sending apparatus according to claim 1, wherein said identification information is composed of a predetermined pseudo-random number and sequence number information unique to said pseudo-random number ([0034] - pseudo random sequence of security signals).

Regarding claim 4, Ofek teaches a sending method comprising: sequentially sending packet data generated based on a predetermined communication protocol via a network ([0024] - sending data packets over the network; [0073] and Fig. 1 - item 110TFG - sending packets; [0028] - implementation of specific protocol); receiving a request from a receiver device to add identification information to said sent packet data only during a predetermined period ([0073] and Fig. 1 - item 120TTC - receiving data packets and checking Security Tags 111 (identification information added to sent packets); [0087], [0103] and Fig. 6 - packets with security tags are sent sending in

Art Unit: 2155

response to time stamps during predetermined time intervals); and adding said requested identification information to said sent packet data, said identification information uniquely identifying each packet of data sent (Fig. 1 and [0073] - Security Tags 111).

3. **Examiner's note:** Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-4 have been carefully considered but are moot in view of the new ground(s) of rejection, necessitated by the Applicant's amendment.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2155

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vitali Korobov whose telephone number is 571-272-7506. The examiner can normally be reached on Mon-Friday 8a.m. - 4:30p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh Najjar can be reached on (571)272-4006. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
